First Golang
At the end, Django

The Django logo, featuring the word "django" in a white, lowercase, sans-serif font, centered on a dark green rectangular background.

django

Backend

Why Django?

The screenshot displays the Visual Studio Code interface for a Django project named 'Rayanesh-Backend'. The Explorer sidebar on the left shows the project's file structure, including folders like 'accounts', 'blog', 'gallery', 'issue', 'podcast', and 'static', as well as files like 'manage.py', 'settings.py', and 'urls.py'. The main editor window shows the 'manage.py' file, which is a Django management utility script. The code includes a shebang line, a docstring, and a 'main()' function that sets the 'DJANGO_SETTINGS_MODULE' and calls 'execute_from_command_line()'.

```
1 #!/usr/bin/env python
2 """Django's command-line utility for administrative tasks."""
3 import os
4 import sys
5
6
7 def main():
8     """Run administrative tasks."""
9     os.environ.setdefault('DJANGO_SETTINGS_MODULE', 'RayaneshBackend.settings')
10     try:
11         from django.core.management import execute_from_command_line
12     except ImportError as exc:
13         raise ImportError(
14             "Couldn't import Django. Are you sure it's installed and "
15             "available on your PYTHONPATH environment variable? Did you "
16             "forget to activate a virtual environment?"
17         ) from exc
18     execute_from_command_line(sys.argv)
19
20
21 if __name__ == '__main__':
22     main()
23
```
